

Coronavirus update March 23, 2020

Wahl Family Dentistry has always put patient and employee well-being first, providing clean, safe treatment environments for all. We know COVID-19, commonly known as coronavirus, is a concern for everyone. We want to protect that continuity of care during these unique circumstances while helping prevent the spread of COVID-19. Governor Carney has ordered all nonessential businesses to shut down starting on Tuesday May 24, 2020 until May 15, 2020 or until the public health threat is eliminated. We will therefore be open for emergencies only starting Tuesday, March 24, 2020 or until May 15, 2020 or until the public health threat is eliminated. Of course, we will be open for emergencies only during this time.

- As always, we follow the precautionary standards set by the American Dental Association and Centers for Disease Control (CDC) to help prevent the spread of the virus and other infectious diseases.
- In addition to sterilizing our instruments with steam autoclaves, we also clean and disinfect our office with products from the EPA's list of registered surface disinfectant products for use against coronavirus.
- We ensure our office teams have the Personal Protective Equipment recommended by the CDC.
- For our patients' protection, we ask that if you are suffering with a fever, cough or other flu-like symptoms, that you call our office at 302-655-1228 to discuss and reschedule. These patients should contact their health care provider.
- We value your trust and will continue to monitor the situation, adapting precautionary measures where needed. For the latest information on COVID-19, please visit the CDC website.
